

Your Report

Name:	Jill Callahan	Date Of Birth:	06/21/1977 (Age: 43 years)
Test Date:	08/05/2020	Gender:	Female
Current Weight:	154 lbs	Height:	5' 7"
Calculated Approximate Ideal Weight:	134 lbs	Activity Level:	Moderately Active
Daily Calorie Expenditure:	2149		
Primary Health Concern:	Menopausal Hot Flashes		

Your Intolerances:
Dairy

Your Other Adjustments:
NONE

Your Endocrine Type (if listed, read the Endocrine Type Guideline): Thyroid Type

Your Assessment Results:

Your Diet Type: Mixed Burner

Your body and all its cells run entirely on energy from the calories found in the foods you eat. These calories come almost entirely from the fats and carbohydrates contained in your diet, and to a very minor degree from protein.

Carbohydrates are the body's first choice for producing cellular energy, especially immediate energy. This is because carbohydrates, obtained easily from foods like grains, fruits and some vegetables, are very quickly converted to sugar in your body. Sugar is the body's most important fuel. But we can only store a small amount of sugar in the liver. On the other hand, fat is your body's primary energy source for sustained energy needs. Unlike sugars and fats, proteins are a poor source of energy, but are necessary to build, repair and maintain nearly all of the body's tissues and organs.

Those who utilize fat and carbohydrates with relatively equal efficiency are called Mixed Burners. The Mixed Burner requires a diet which provides the correct amounts and types of fats and carbohydrates for both immediate and sustained energy needs, in addition to adequate protein to maintain the body's integrity.

Your Recommended Daily Food Intake

Name: Jill Callahan
Test Date: 08/05/2020

Recommended Daily Food Intake Ranges

	-2 lbs / wk	Maintain Weight
Calories:	1149	2149
Protein:	74 grams	94 grams
Fat:	38 grams	79 grams
Carbohydrate:	128 grams	266 grams
Fiber:	16 grams	30 grams
Pure Water:	67 oz	77 oz

Approximate Calorie Ratios

Your Recommended Daily Intake Ranges were calculated using advanced scientific formulas to help you achieve or maintain your ideal body weight. To find your ideal daily food requirements, please follow the instructions in the supporting documents: Creating Whole Food Meals, Measuring Food Quantities, and Your Body Mind Food Log.

Finding the correct macronutrient ratios of proteins, carbohydrates, and fats, improves many health issues; especially weight loss, fatigue, mental clarity, and emotional well-being. The Macronutrients document and Your Body Mind Food Log are your best tools to help you discover your ideal daily meals to achieve optimal health.
