Primary Health Concern:	Celiac Disease or Extreme Gluten Intolerance		

Your Intolerances:
Glutamates, Gluten

Your Other Adjustments:
Genetic Conditions Affecting Health

Your Endocrine Type (if listed, read the Endocrine Type Guideline): Adrenal Type

Your Assessment Results:

Your Diet Type: Fat Burner

Your body and all its cells run entirely on energy from the calories found in the foods you eat. These calories come almost entirely from the fats and carbohydrates contained in your diet, and to a very minor degree from protein.

Of these three calorie sources, fats are the real king of calories. This is because fats provide almost twice especially weight loss, fatigue, mental clarity, and emotional well-being. The Macronutrients document and great source of stored energy and is your body's primary energy source for sustained energy needs. But it is not a good source of immediate energy. Carbohydrates are the body's best source of quick energy. Proteins are a poor source of energy, but are necessary to build, repair and maintain nearly all of the body's tissues and organs.

Those who utilize fat very efficiently are called Fat Burners. But you can be a Fat Burner and still have excess stored fat. The Fat Burner requires a diet which provides the correct amount and types of fat, but also adequate amounts of carbohydrates to meet its quick energy needs, and adequate protein to maintain the body's integrity.

Your Recommended Daily Food Intake

Name: Max Thorsheim
 Test Date: 01/23/2021

Recommended Daily Food Intake Ranges

	-2 lbs / wk	Maintain Weight
Calories:	1882	2882
Protein:	83 grams	106 grams
Fat:	86 grams	137 grams
Carbohydrate:	194 grams	307 grams
Fiber:	26 grams	40 grams
Pure Water:	76 oz	97 oz

Approximate Calorie Ratios
